conmove

OUR APPROACH TOWARDS THE PROBLEM

1. Detailed discussion on the requirements by considering the business parameters –
**Type of trip (Empty / Loaded),
Activity (Import/Export/Domestic)**

2. Make product ready &categorized into two phase of implementations **- 1) UAT. 2) Go-Live**

3. As per the requirements make the product ready & set up the UAT process.

4. Made the final changes with the product as per the last UAT

5. Invoicing sequence &formatting of invoice is the mail findings of UAT.

6. Make the final product ready as per the UAT findings & be ready with Go-Live environment.

conmove

RESULT & OUTCOMES

1. One stop solution & single window for Service User (Customer) & Service Provider.

2. Minimize of human intervention & involvement in the operation.

3. Easily creation on the booking against every trip separately & managed their status.

4. Elimination of the human error & mismatch information & every person have the clear visibility.

5. Auto creation of LR based on the booking information.

6. Invoice creation against each booking by selecting the multiple billing heads.

conmove

RESULT & OUTCOMES

7. E-Invoicing against the invoices has been created.

8. Real time dashboard & Sales Reports with weekly, monthly, yearly filters.

9. All access & rights are reserved against one single admin

10. Under one login admin able to create their users & provide the access accordingly.

11. POD uploader &feature to store the POD for future reference.

conmove

CONCLUSION

PSA Ameya CFS stands at the forefront of modern logistics, integrating **Conmove's** advanced tracking technology with robust infrastructure to redefine efficiency in cargo management, setting new benchmarks for the future of global trade.
As a trusted leader in freight solutions, it exemplifies how collaboration with innovators like Conmove can transform logistical complexity into seamless, sustainable success.
